

Information For World Class Commissioning

Strategy Planning	
Joint Strategic Needs Assessment (JSNA)	JSNA core dataset focussing on a list of indicators, cross-tabulated against Vital Signs and the National Indicator Set
Compendium of Public Health Indicators	How are you performing against over 250 public health indicators?
Health Poverty Index	Compare areas on factors influencing health inequalities
Neighbourhood Statistics Service	Understand the factors involved in reducing neighbourhood deprivation levels
Social Care publications and statistics	How much is being spent on social care services locally?
Healthcare Resource Groups (HRGs)	Supports determining of service provision based on measuring current and future treatments
NHS Comparators	Supports practice-based commissioning by understanding local activity, costs, and outcomes
Lifestyle Publications	Insight into alcohol consumption, obesity, smoking, drug misuse, and specialist surveys relating to young people
Programme Budgeting	Plan budgets using NHS Comparators and Compendium of Public Health Indicators
National Child Measurement Programme	Informs local planning and delivery of services for children through insight into growth patterns and obesity

Monitoring and Evaluation	
NHS Comparators	Appraise local in/outpatient disease area activity, costs, outcomes, and identifying prescribing activity
Quality Outcomes Framework	Resourcing healthcare based on practice-level prevalence data
National Clinical Audit Support Programme	Compare clinical conditions and treatment received for cancer, heart disease, diabetes and renal services
Health Survey for England	Annual snapshot of the nation's health and health needs
Over 120 health and social care publications	Comprehensive insight into disability, older people, screening, eye care, maternity, general practice, and mental health
Healthcare Resource Groups (HRGs) Secondary Uses Service (SUS)	Enables benchmarking of treatment patterns and service usage across the entire health economy

Procuring Services	
iView Workforce	Resource enabling NHS workforce planning, using statistics on NHS staff numbers, earnings, turnover, and vacancies
Hospital Episode Statistics (HES)	Records of all admissions to NHS hospitals in England
18 Weeks Reporting Tool	Informs resourcing based on tracking of patient progress through 18 week treatment pathways
Healthcare Resource Groups (HRGs)	Supports delivery of future patient care based on current patient need
NHS Comparators	Identifying patterns of referrals from Primary to Secondary care
General Practice & Dentistry	Statistics providing insight into earnings, expenses, levels and types of activity
The Secondary Uses Service (SUS)	Identifies the cost of provider activity against the national tariff - highlights coding activity, ensuring accuracy in provider payments
